

## Malaria Hoops

Your section can learn about malaria and how it can easily be prevented

This game is extremely simple to run!

Explain to your section that malaria kills hundreds of thousands of people each year but can easily be avoided by sleeping under mosquito nets

- Place a certain number of large hoops (which are now mosquito nets that protect those stood inside them) on the floor
- Tell the young people to run around the meeting place until you shout 'MOSQUITO'.
- When this happens, they must jump into a hoop as soon as possible. More than one person can be protected by a hoop
- After each turn, remove a hoop. Those who don't make it to a hoop in time are out of the game

The winners are those left in the last hoop

**Suitable for :**

**BEAVERS**  
**CUBS**  
**SCOUTS**

This activity is part of the 'Go Global' resource created by Shelterbox, in partnership with The Scout Association; to help Leaders deliver global and international programme activities.
